

Deanery CE Primary School

Subject Vision- Art

Intent

At The Deanery CE Primary school, Art and Design activity enriches children's learning and enables them to communicate their thoughts, ideas and observations in a practical and expressive way. In talking about art and evaluating their own and others' work, children are encouraged to develop their visual language, ideas and feelings. Through experience of a variety of materials, tools and techniques, children have the opportunity to record creatively the world around them.

We strive as an outstanding school to provide a creative and enriching learning experience for all pupils. We believe all children should reach their full potential, recognising personal strengths and celebrating personal achievements of themselves and others; both within the school and its wider community.

Implementation

The Deanery CE Primary School Art and Design curriculum for aims to ensure that all pupils:

- Produce creative work, explore their ideas and record their experiences.
- Become proficient in drawing, painting sculpture and other art, craft and design techniques.
- Evaluate and analyse creative works using the language of art, craft and design.
- Study great artists, craft makers and designers, and understand the historical and cultural development of their art form.

Class teachers are usually responsible for teaching art and design technology, although there will be times when professional artists/helpers will be involved in the teaching of the topic. We take every opportunity to develop links with outside agencies and our partner schools in order to enrich our Art and Design provision.

Impact

The Deanery children enjoy the self-expression that they experience in both Art and Design Technology. They are always keen to learn new skills and work hard to perfect those shown to them. The children's art is very often cross-curricular, and helps them to express feelings and emotions through art, as well as show their knowledge and understanding in history, geography and science.

Through their art and design, the children are able to reach out into the community, with our pupil's artwork proudly displayed around the school and its collaborating partner schools.
